

WEST END BOAT CLUB

When a group of friends formed the West End Boat Club in 1895, the history of the Club was written in an unbroken line of friendship and camaraderie stretching from its first home At Riverfront and Norris Street in Chester, to the building over the water at Central Avenue, through it's golden age at Jeffrey Street, to its present home in Essington. The common factor that has always allowed the Club to succeed and excel has been the quality and character of the membership.

The club owes its success to a long line of officers and volunteers who have donated their time and efforts to the betterment of the Club.

Please enjoy a few early and recent photographs of the WEBC in Essington.
